

Disclosure on Unsold Consumer Products

Ecodesign for Sustainable Products Regulation (ESPR) – Article 24 (Interim Disclosure)

1. General Information

Company: Sinelco International BV

Reporting period: FY2025

Methodological note:

This disclosure has been prepared in alignment with Article 24 of the Ecodesign for Sustainable Products Regulation (ESPR). As detailed implementing requirements are not yet applicable, this disclosure follows a best-effort approach. Certain data points are currently limited or unavailable. Sinelco is actively enhancing its data systems to improve future reporting accuracy and granularity.

2. Volume of Unsold Products Destroyed

- **Total weight of unsold products destroyed:**
17,000 kgs
- **Total number of units destroyed:**
Not fully available

Sinelco currently tracks unsold product destruction primarily on a **weight basis**. Unit-level data is not consistently captured across all product categories and channels.

3. Breakdown by Product Category

Due to current data limitations, detailed SKU-level reporting is not available. Where possible, products are grouped into high-level categories:

Product Category

Cosmetics (e.g. hair and nail care)

Electrical Products (e.g., hair dryers, clippers, styling tools)

Mixed / Unclassified

Where categorisation is not feasible, products are reported under **mixed waste streams**.

4. Reasons for Destruction

Unsold products may be destroyed for the following reasons:

- Expired shelf life
- Health and safety requirements
- Damaged or defective goods
- Returned products not suitable for resale
- Regulatory or compliance constraints
- Operational and logistical limitations

At this stage, Sinelco is **not able to quantify the proportion of products per reason**.

5. Measures to Prevent Destruction

Sinelco is implementing measures to reduce the destruction of unsold products, including:

- Improving demand forecasting and inventory management
- Increasing use of discounting and outlet channels
- Exploring donation opportunities where feasible
- Enhancing product lifecycle management

These initiatives are being progressively implemented. Their **quantitative impact is not yet systematically measured**.

6. Future Alignment

Sinelco will continue to enhance its disclosures and align with future delegated acts under Article 24 of ESPR once detailed requirements on format, methodology, and scope become applicable.
